**BIGGLESWADE URBAN  
DISTRICT**

**ANNUAL  
REPORT**

**For the Year**

**1953**

OF THE  
**MEDICAL OFFICER OF HEALTH**  
AND  
**SANITARY INSPECTOR**

## ANNUAL REPORT FOR 1953

---

To the Members of the Biggleswade Urban District Council.

Mr. Chairman and Gentlemen,

I have the honour to submit the Annual Report on the health, vital statistics and sanitary conditions of the Biggleswade Urban District for the year 1953.

Inspection of the vital statistics shows that there would appear to be a very considerable increase in the death rate for 1953, the adjusted rate being 13.7 as compared with 9.4 for 1952 and with 11.4 for England and Wales. Before 1953 the deaths occurring in hospitals were assigned to the district in which the persons normally resided. Since 1st January, 1953, however, deaths in hospitals and certain institutions have been assigned to the district in which the deaths occurred. This meant that the whole of the 40 deaths occurring in the hospital in Potton Road, Biggleswade during the year were attributable to the Urban District. Only a very few of these deaths were of Biggleswade residents. If the death rate were calculated only on the deaths of persons normally resident in Biggleswade, it would be very similar to that of 1952 and considerably below that for England and Wales.

Diseases of the Heart and Vascular System and Cancer were the main causes of death, the numbers being 61 and 15 respectively out of a total of 115 deaths.

The birth rate of 12.0 shows a considerable drop from the rate of 18.8 last year, but is to some measure compensated by the fact that the infant mortality is the lowest ever recorded in the Urban District, viz., 11.5 as compared with a rate of 26.8 for England and Wales and 24.5 for the County as a whole. There were no deaths from diseases and accidents of pregnancy and child-birth.

The number of cases of notifiable infectious diseases (excluding Tuberculosis) was 151, just half the number notified in 1952; Measles again being the most prevalent disease with 121 notifications. No cases of Diphtheria or Poliomyelitis were notified and there were no deaths from infectious disease.

I wish to thank the officials of the Council and the staff for their continued co-operation.

I am,

Your obedient servant,

C. A. HARVEY,

*Medical Officer of Health.*

## GENERAL STATISTICS

Area (in acres) ... ..	4,647
Registrar-General's estimate of Home Population ...	7,445
Number of inhabited houses end of 1953 ...	2,328
Rateable Value ... ..	£42,493
Sum represented by a penny rate ... ..	£163 2s. 8d.

## VITAL STATISTICS FOR THE YEAR

### Live Births

## GENERAL PROVISION OF HEALTH SERVICES

### Public Health Officers

Medical Officer of Health—

C. A. HARVEY, M.B., Ch.B., D.P.H.

Sanitary Inspector, Engineer and Surveyor—

T. WILSON, M.Inst.M.E., M.R.S.I.

### Laboratory Facilities

The services of the Public Health Laboratory, General Hospital, Kimbolton Road, Bedford, is available for the examination of any material submitted by the Health Department or by General Practitioners. This service is under the direction of the Medical Research Council through the Ministry of Health, and there is no charge to the Council. The Laboratory undertakes the examination of throat swabs, sputum, urine and fæces, and blood from all cases of suspected infectious disease, and advice and assistance is always available.

### Ambulance Facilities

The Bedfordshire County Council provides a complete service covering the whole of the County. The service is a twenty-four hour one and is free of charge, and is available for the removal of all cases requiring admission to hospital and also for the transport of patients who are unable to use other means of transport to and from Hospitals or Clinics, so that they can receive any necessary treatment. The request for the provision of an ambulance must be made by a General Practitioner or by an Authorised Person.

The service is also available for the transport of persons suffering from infectious disease to isolation hospital.

The following depots are situated in the eastern and northern districts of the County :—

Biggleswade ...	Crab Lane	Tel. : Biggleswade 2295.
Bedford ...	Dents Road	Tel. : Bedford 5335 & 5336.

### Midwifery and Domiciliary Nursing Services

The County Council are the responsible Authority for these services. One midwife is available for Maternity cases and one Nurse for Minor Medical and Surgical Cases.

## Clinics and Treatment Centres

Maternity and Child Welfare :

Child Welfare—"The Lawns," Biggleswade, Tuesday afternoons.

Ante and Post Natal—"The Lawns," Biggleswade, alternate Tuesday mornings.

## Venereal Diseases

Bedford General Hospital, South Wing. The days and times of attendance are :—

Males	...	Monday to Friday	...	4—8 p.m.
Females	...	Monday and Tuesday	...	6 p.m.
		Wednesday	...	5—7 p.m.
		Thursday	...	5 p.m.
		Friday	...	3—5 p.m.

## Tuberculosis

The Chest Clinic, Bedford General Hospital, North Wing, Kimbolton Road, Bedford. The days and times of attendance are :

Monday	...	2 p.m. to 7 p.m.	Refills (A.P. and P.P.)
Tuesday	...	9 a.m. to 1 p.m.	{ Women and children—new and old patients
		2 p.m. to 5.30 p.m.	
Wednesday	...	9 a.m. to 1 p.m.	Contacts
		2 p.m. to 5.30 p.m.	Old patients—male and female
Thursday	...	9 a.m. to 5.30 p.m.	Males—old and new patients
Friday	...	9 a.m. to 1 p.m.	Refills (A.P. and P.P.)
		2 p.m. to 5.30 p.m.	Special cases.

## SANITARY CIRCUMSTANCES OF THE AREA

### Water Supply

Water is supplied to the area by the Biggleswade Water Board and has proved very satisfactory in quality and quantity. Samples have been taken periodically during the year and the results have shown that the supply is of the highest standard of organic and bacterial purity.

The following report by the Counties Public Health Laboratories of a sample sent for examination on 15th April, 1953, is typical :

### Chemical Examination in parts per Million

Appearance—bright, with a few mineral particles.

Colour	...	...	...	...	...	...	...	Nil
Odour	...	...	...	...	...	...	...	Nil
Turbidity	...	...	...	..	...	...	...	Less than 3

Reaction pH. Neutral	...	...	...	...	...	7.3
Free Carbon Dioxide	...	...	...	...	...	18
Electric Conductivity at 20 degs. C.	...	...	...	...	...	550
Total Solids dried at 180 deg. C.	...	...	...	...	...	370
Chlorine present as Chloride	...	...	...	...	...	18
Alkalinity as Calcium Carbonate	...	...	...	...	...	245
Hardness: Total	...	...	...	...	...	310
Carbonate	...	...	...	...	...	245
Non-Carbonate	...	...	...	...	...	65
Nitrate Nitrogen	...	...	...	...	...	0.00
Nitrite Nitrogen	...	...	...	Less than	...	0.01
Ammoniacal Nitrogen*	...	...	...	...	...	0.007
Albuminoid Nitrogen*	...	...	...	...	...	0.000
Metals	...	...	...	...	...	Absent
Free Chlorine Reaction	...	...	...	...	...	—
Oxygen absorbed in 4 hrs. at 27 degs. C.	...	...	...	...	...	0.10
Residual Chlorine	...	...	...	...	...	Absent

\* To convert to Ammonia multiply by 1.21.

### Bacteriological Examination

Number of Colonies developing on Agar per cc. or ml. in—

1 day at 37 degs. C.	...	...	...	...	0 per ml.
2 days at 37 degs. C.	...	...	...	...	0 per ml.
3 days at 20 degs. C.	...	...	...	...	2 per ml.
					Absent from
Presumptive Coliform reaction	...	...	...	...	100 ml.
Bact. coli. (Type 1)	...	...	...	...	100 ml.
Cl. welchii reaction	...	...	...	...	100 ml.

This is a very satisfactory sample. It is clear and bright in appearance and is of the highest standard of bacterial purity, consistent with a wholesome water suitable for drinking and domestic purposes.

### Drainage and Sewage

With the exception of a few cottages on the Langford Road and some outlying cottages, the whole of the area has a water carriage system. The sewage disposal plant has been working to capacity. The length of new sewers laid during the year is given in the Sanitary Inspector's report. The cesspools of the outlying unsewered properties are emptied by arrangement.

## INFECTIOUS DISEASES, OTHER THAN TUBERCULOSIS

### (a) General Statistics

The following table shows the number of cases of infectious diseases notified during the year, together with the number of cases admitted to hospital and the deaths from these diseases.

#### Diseases (other than Tuberculosis) notified during the year 1953.

Disease	Total cases notified	Cases admitted to Hospital	Total registered deaths
Scarlet Fever ... ..	2	—	—
Pneumonia ... ..	2	—	—
Erysipelas ... ..	1	—	—
Measles ... ..	121	—	—
Whooping Cough ... ..	22	—	—
Jaundice ... ..	3	—	—
Total ... ..	151	—	—

### (b) Individual Diseases

*Scarlet Fever*—Two cases were notified.

*Diphtheria*—No cases were notified.

*Measles*—The number of cases notified was 121 as compared with 134 in the previous year.

*Whooping Cough*—Twenty-two cases were notified.

*Pneumonia*—Two cases were notified.

*Erysipelas*—One case was notified.

*Jaundice*—Three cases were notified.

Analysis of Cases of Infectious Diseases notified during the year ended 31st December, 1953.

	Under 1 year	1 to 3	3 to 5	5 to 10	10 to 15	15 to 25	25 to 35	35 to 45	45 to 65	65 and upwards	Total all ages

## **CLEANSING OF VERMINOUS PERSONS**

### **Public Health Act, 1936, Sec. 85**

#### **Scabies**

By arrangement with the Borough of Bedford, infected persons and contacts are treated at the Treatment Centre, Bedford.

#### **Prevention of Blindness**

No action was necessary under Section 176 of the Public Health Act, 1936.

#### **School Closure**

It was not found necessary to close any schools in the area on account of infectious disease.

#### **Eradication of Bed Bugs**

It was not found necessary to disinfect any houses during the year.

Thermatox disinfectors and Bombay liquid spray is available for use when required.

## I. IMMUNISATION AGAINST DIPHTHERIA

The table given below shows the number of children under 15 years of age who have received protective treatment against Diphtheria. The County Council, under the National Health Service Act, 1946, provides this treatment free of charge through the family doctor or at school or a child Welfare Centre. The figures have been supplied by the Eastern Divisional Medical Officer. It is still necessary to urge all parents to give their children the protection which can be had free of cost from their own doctor or at a Welfare Clinic or at School.

Since the introduction of immunisation throughout the country, there has been a remarkable decline in the number of cases and deaths from Diphtheria, and in many of the smaller areas, no cases have occurred for several years, with the result that the seriousness of the disease tends to be forgotten. Should the percentage of children protected against the disease decline, there is a danger that diphtheria may once more take its toll of child life.

### Primary Immunisations completed during 1953

Number of children during the year 1953 who completed a full course of Primary Immunisation in the Authority's Area (including Temporary Residents)

Age at 31.12.53 i.e. Born in year	Under 1 1953	1 1952	2 1951	3 1950	4 1949	5 to 9 1944-1948	10 to 14 1943-1939	Total under 15
Number Immunised	8	62	7	—	1	20	2	100

## II—Diphtheria Notifications and Deaths in relation to Immunisation

Age at date of notification	Number of cases notified	No. of cases included in preceding column in which child had com- pleted full course of immunisation	Age at date of death	Number of deaths	No. of cases included in preceding column in which child had com- pleted full course of immunisation

### Public Health (Prevention of Tuberculosis) Regulations, 1925

No action was taken under these regulations, or under section 172 of the Public Health Act, 1936.

# REPORT OF SURVEYOR AND SANITARY INSPECTOR

Year Ended 31st December, 1953

## Building Plans

The following building plans were approved by the Council and work inspected and drains tested during course of construction :—

Dwellings	...	...	...	...	13
Alterations, additions, conversions	...				24
Garages	...	...	...	...	8
Caravans	...	...	...	...	2
Accesses	...	...	...	...	—
Workshops	...	...	...	...	3
Factories	...	...	...	...	1
Petrol Tanks	...	...	...	...	2
Sports Pavilion	...	...	...	...	1
Change of use	...	...	...	...	1
Advertisement signs	...	...	...	...	4
Greenhouses, agricultural buildings, store sheds, etc.	...	...	...	...	5
					<hr/> 64 <hr/>

## General Sanitary Inspections

The following inspections were made and nuisances abated or defects remedied where necessary by informal action :—

Housing defects	...	...	...	...	1376
Unfit houses	...	...	...	...	31
Defective drains	...	...	...	...	32
Factories	...	...	...	...	10
Water wastage	...	...	...	...	761
					<hr/> 2210 <hr/>

Thirty-eight inspections were made in connection with Rodent Control, treatment being necessary in 19 cases, and one test baiting of sewers was carried out.

## Meat and other Foods

The following foodstuffs were condemned as unfit for human consumption :—

Meat	...	...	...	...	...	333 lbs.
Offal	...	...	...	...	...	1½ lbs.
Fish	...	...	...	...	...	135 lbs.
Canned Meat	...	...	...	...	...	652 lbs.
Cheese	...	...	...	...	...	—
Various tinned foods	...	...	...	...	...	119 tins

All meat is slaughtered and allocated from a Ministry of Food Slaughterhouse in the neighbouring Rural District, where it is properly inspected.

## Factories and Workshops

The following factories and workshops are registered :—

Brewers	...	...	...	...	...	1
Millers	...	...	...	...	...	3
Motor and Cycle Engineers	...	...	...	...	...	12
General Engineers	...	...	...	...	...	5
Joiners	...	...	...	...	...	4
Plumbers	...	...	...	...	...	4
Printers	...	...	...	...	...	2
Tailors	...	...	...	...	...	2
Boot Repairers	...	...	...	...	...	5
Laundry	...	...	...	...	...	1
Caravans	...	...	...	...	...	1
Lingerie Manufacture	...	...	...	...	...	2
Bookbinding	...	...	...	...	...	1
Miscellaneous	...	...	...	...	...	17

## House Scavenging

A 10 cubic yard Karrier refuse collecting vehicle is used for this work, with occasional assistance by ordinary motor transport. The refuse is satisfactorily disposed of by means of controlled tipping.

Owing to the reduced demand the collection of waste paper salvage was discontinued at the beginning of this year. The salvage of scrap iron and rags was undertaken, however, during the latter part of the year and is being continued.

## Sewerage

The following lengths of new sewers were laid during the year for the purpose of serving housing estates : London Road Estate—100 yards 9in., 285 yards 6in. soil sewers and 33 yards of 9in. and 172 yards 6in. surface water sewers. 176 yards of 4in. C.I. rising main were also laid. A new pumping station fitted with two 3in. Barrington 75 g.p.m. pumps was constructed and put into operation for this estate. 10 new connections were made to existing sewers.

## Water Supply

The following lengths of new water mains were laid during the year for the purpose of serving housing estates : London Road Estate—116 yards of 4in. and 149 yards of 3in. C.I. water mains, and 26 new connections to the Council's mains were made during the year.

The total consumption of water for the year, inclusive of trade supplies, was 125,633,000 gallons. This is an increase of approximately 8,000,000 gallons on the figures for the previous year. The overall daily average consumption of water was approximately 45 gallons per head of the population.

Seven hundred and sixty-one inspections for water wastages were made. 23 notices were served requiring repairs to prevent waste, and 656 taps were re-washed free of charge.

## Housing

During the year the construction of a further 80 traditional houses was commenced, and a total of 35 houses were completed and occupied. The construction of 26 Non-traditional type houses (Unity) was also commenced during the year.

T. WILSON, M.I.Mun.E., M.R.S.I.,

*Surveyor and Sanitary Inspector.*
